

# Corporate Profile

## About Us

MSys is a global provider of test and development products and services for storage, server and virtualization vendors. With its deep technical expertise, suite of test automation products and global-shoring model, MSys delivers unprecedented value in the areas of storage, servers, virtualization, ISV, embedded and system applications. The company is headquartered in Chennai, India and has an office in Atlanta, USA.

## Value Proposition

Traditional services companies comprise of a sea of employees working on a seemingly infinite domains without focus. The original value proposition of lowered costs and high value delivery via best-shoring got diluted in the craze of expansion of scale and quest for more and more 'billed' resources and projects. Founded by top executives from leading global IT companies, MSys is a company formed to correct this and provide long-promised true transformation. We offer:

- **Innovation** – Innovative products and services which enable our customers to achieve higher levels of success in terms of revenue and profits.
- **Quality Solution & Speed of Execution** – Deliver the highest quality solution with excellent speed of execution.
- **Expert Engineering Self-Starter Team** – Can take a project from requirements to completion with effective communication between various global teams.
- **Global Project Delivery** – Utilize industry standard project and agile process management methodology.
- **Cost Reduction** - Significantly reduce the cost dynamics compared to in-house development or other off-shoring companies. We guarantee at least 20% lower costs compared to established larger outsourcing vendors.
- **Value Creation** – Keep the customer's business goals in every point of service.

## Key Management

- **Sanjay Sehgal**, Chairman and Co-Founder

## Solutions

### MSys Test Automation Software

Getting storage, server and appliance products ready for release requires a lot of testing of different permutations and combinations (i.e. different operating systems, drivers, allied products, firmware, and applications) for which the cost and time taken are very high. MTAS provides a solution that solves this problem and meets both engineering and business goals.

### Creative Services

We offer creative services based on MSys Test Automation Platform and Products. Our platform consists of ready re-usable components. We would love to work in partnership with any existing test automation that you may have already in place thus adding complementary value and strengthening it.

## Success Stories and Sample Customers

MSys customers include 3 out of top 5 world leaders in storage, servers and virtualization. For example, Promise Technology Announces Agreement with MasterSys Tech Pvt Ltd, India.
